

Care of your Elephant Hair Bracelet

Clean it just like you would any other piece of .925 Sterling Silver and 14K Gold jewelry.

Personally, I don't use harsh chemicals on my metals. There are cloths and dips available that are gentler than others. You'll find a small Sunshine™ Cloth in your box.

Using the cloth will only shine the places it touches.

Using a dip and a soft brush will get a lot of the patina off.

An ultrasonic jewelry cleaner will bring it back to its original shine.

Rinse well, and let it dry completely before sliding the knots.
